Supplementary Instruction For Project 1

FTE 4560

Spring 2021

Here are some supplementary instructions for project 1.

- **DDL.** The deadline is **11:59 p.m., 24th, March, 2021**. Late submission can only obtain 50% grades.

- **Team Member.** You can complete this project in cooperation with other students. But the number of team members should be **no large than** 5. The grading is based on the overall performance and individual contribution, therefore a large team itself does not affect the grades.

- **Submission.** You should carefully read the following instructions since your grades are mainly based on your report.

  – It's okay that only one of your teammates submits the report (in the pdf format) and code in a single "zip" file.

  – Your report[1] should: 1) list the names of all teammates and the corresponding student ids; 2) clearly state the results; 3) **contain a description about the contributions of each member**.

  – Your code should contain an "README" file that states the package requirements and how to run this code.
